New Customers

Dialog Finansrådgivning

We signed with a new Independent Financial Adviser company in Oslo Norway early March. The name is "Dialog Finansrådgivning".

Dialog is a completely independent advisory company with offices in Oslo and Trondheim. It is a small niche boutique for wealthy private individuals.

Pre Management

This is one of the most successful investment collective scheme companies in Norway. There is a new breed of syndicated investment companies growing up in Scandinavia, based on investment in Properties, Shipping and other asset classes. This is one of the most successful ones.

Our new software system called "TransactionCube" is so far the only system designed for this market, and we are thrilled that we have signed this contract, even before the system is launched.

TransactionCube

This is our new transaction technology. We are in "late test" with this technology and expect to deliver to the first customer April 1st.

TransactionCube makes it easy for client of collective investment schemes (mutual funds, unit trust, Norwegian registered invest companies) to streamline order flow in initial offering, 2nd hand market transaction, back office administration and bank and market integration. This is a benefit for end client, the adviser and provider of collective investments.
