

## Value Added Services

### Commission Calculation and Tracking

Our Commission Tracker is an advanced commission calculation and follow up technology. We have designed it so that it will fit into almost any kind of commission in the market. Both management and every single adviser have full control and audit trail of all commissions calculated every day, week and year. What is expected commission next month, based on business so far? There are reports for this.

#### 4 layer calculation.

We have included a 4 layer calculation, calculate and follow up on every level and summary of levels.

1. Network of IFA's
2. Company of individual IFA's
3. Individual IFA's
4. Provider / Fund manager

You may split commission on many advisors.

#### Dimension.

We have included 2 different dimensions to cover your most extreme needs. Within every one of these there are a list of details.

- Initial Investment (new business)
- Annual/trial commission

Annual / Trial Fee type of commission is calculated regularly based on updated market value. It may have payment once a month, quarter, half year or year.

#### Follow Up and Reconciliation.

We have included a follow up system. Did you receive your commission correct? If not who does what and when? Flexible registration and reporting.
