

Press Release

September 2008

Monthly Update

Spain

We have signed a new contract in Madrid with “CM Capital Market”. CM Capital Market is one of the largest fund supermarkets in Spain and Portugal, with a marketing activity in Brazil. After a period of technical integration between their web platform and our platform “AdvisorCube” we expect to launch a bundle service Q1 2009. This will benefit our Scandinavian customers as well as give FinanceCube a substantial market penetration in Spain and Portugal.

TransactionCube

Our new service TransactionCube is progressing very well. We had a pilot customer workshop in September in our office in Drøbak with our programmer from Cyprus and our Norwegian and Finnish pilot customer. This will be the “first of the shelf” web platform for transaction and orders in investments like Guaranteed Products, Syndicated investments in addition to Mutual Funds, Unit Trusts etc We will also include a internal order book and match functionality based on MiFID and “Treat Your Customer Fairly” principle.

Integration

We included Morningstar “on demand” + MSCI world indexes service in our platform and cleaned up our market database during the summer. We also finished the integration with Vital, the Norwegian Insurance Company.
