List of Changes

Functionality: Company Setup

Where: Personal-> Company Setup

What: Allows Network Administrators to insert new companies within the network, modify existing companies and delete unused ones.

Functionality: Prohibit clients from changing their social security number.

Where: Personal-> Change Private Info

What: Simple clients are not allowed to modify their social security number. This can be only achieved by their advisor or network administrator.

Functionality: New Message

Where: Start Page, when you log on.

What: New messages to all users of Advisor Cube. Under the log on with name, password and pin is a new information Icon.

If there are any important message from the service we will write it here, in English.

For example "the service will be out of order from 19.00 to 19.30 CET(Central European Time) today due to maintenance".
