### List of Changes

---

#### **Functionality: Generate Transactions - Instrument List**

**Where:** Personal → Instrument Setup (Visible only when "Use Generate Transactions" = "Yes" (from Network Main Setup page))

**What:** Gives the ability to the Network Administrator to set up additional fields for one or more instrument. These fields will be used in "Generate Transaction Process" - Confirmation Page (e.g. Subscription Fee, Management Fee etc).

An extra functionality is given, for naming these fields according to network's language preferences.
