List of Changes

Functionality: Instrument Listings

Where: Manual->Instrument Listings

What: Searching for an instrument, provides you with two new pieces of information: First Updated and Last Updated. Those refer to the first and last date that an instrument's price was updated in AdvisorCube

Functionality: Adviser Visibility

Where: Personal-> Adviser Visibility

What: Network Administrator has the ability to select which menu choice will be visible / invisible in the adviser level. Select the appropriate tab from the list and check / uncheck the necessary menu choice for each adviser individually. Press save (save icon) to save your selection.

*All menu choices are visible by default.
