

Press Release

Date: May 2005

Contact: Lasse Meholm, lasse@financecube.net

FinanceCube is created to serve the needs of financial advisers, discretionary asset managers and private banking. FinanceCube provides a unique portfolio management service across asset classes, currency types, time zones and regions. FinanceCube enables advisers to manage client portfolio effectively at an affordable cost.

FinanceCube has developed innovative new web based software, host the internet server and connected the server to the financial marketplace and key providers like Morningstar, Financial Times Interactive Data and many more. Easy and totally secure.

FT Interactive Data is the major operating subsidiary of [Interactive Data Corporation](#), (NYSE: IDC) a leading global provider of financial and business information to institutional and individual investors. Interactive Data Corporation delivers real-time, end-of-day, and historically archived data to its customers through a variety of products featuring Internet, dedicated line, satellite, and dialup delivery protocols.

We collect, edit, maintain, and deliver data on more than 3.5 million securities, commodities, and derivative instruments traded around the world.
